At 8 A.M. Benjamin Hervey refused doing his duty for which reason he was seized up in the mizen rigging and while seized up the Capt. asked him several times whether he would obey his orders and go to work but he still refused. All hands were then called aft and in their presence the Capt. again asked him if he would go to work but he would give no satisfactory answer the Capt. then struck him five or six times with a piece of warning when he said he would go to work the seizings were then taken off and he went about his work as he was ordered
